

P-0086

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment. yes

no to trans-  
porting radio-  
active waste to  
Hanford!

Not long ago there was a major train  
derailment just west of the Dalles, OR. Several  
tanker cars tipped over and had to be drained  
of their toxic contents. It was an accident.  
Accidents happen! Trucks are often  
involved in accidents on our roads, with  
contents spilled onto the ground. If those  
contents were radio active, it would be a  
catastrophe of major proportion. Trucks carrying  
radio active waste should not be on our highways!

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

Please know that I do not support  
the continued practice of importing and  
burying radioactive & chemical waste.  
Shipping things there & putting them down  
the interstate and increases risks along  
these highways.

Already an already environmental  
disaster & clean-up is slow. This further  
burdens this process & endangers the  
groundwater that is contaminated  
reaching the Columbia River. At least give us a  
choice to not do it.

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

- 1 As a taxpayer and citizen of Washington  
I am requesting that DOE quit  
stalling and playing games with the  
Hanford cleanup. I fully support a  
2 ban on any new waste coming to  
Hanford until the old waste is  
100% cleaned up.

Please send me a response to my comment.

- 1 Please do not close the opportunity for public  
comment on the Hanford Site. To date there has  
been damage done to the Columbia River and the life it  
supports. Dumping more ~~to~~ radioactive waste at Hanford  
increases human health from contaminated groundwater.  
Allowing further dumping puts at risk the economy of  
this state.

- If this administration can afford to wage a war and  
give a tax reduction to the most wealthy it doesn't  
give that it can ignore a correctable problem like  
2 Clean up of Hanford. Certainly don't add MORE waste!

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

1 It is hard for me to understand why shipping nuclear waste in trucks on our busy freeways to the Hanford Reservation is even being considered. These trucks not only could result in terrible accidents but would be very vulnerable to terrorists.

2 Hanford has already contaminated the Columbia River. Some of the tanks are leaking. Contamination of salmon is extremely serious - affecting those who eat them and people whose livelihood depends on them.

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

Dear Mr Collins

1 I would like my voice to be heard, along with many, many other citizens that national radioactive waste NOT deposited at Hanford WA Site. Hanford is the nation's most contaminated area already. Citizens have been <sup>for years</sup> voicing strong disapproval - it seems to be hitting a brick wall. Hanford already has great & many problems to get the existing radioactive materials taken care of. If not for the health of the people in that area - think think think of the Columbia River contamination! Please DO

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

- 1 The new draft EIS which is supposed to  
analyze the risks of importing and burying  
radioactive and chemical waste at Hanford,  
reissued in April, still fails to adequately  
2 address citizen's concerns. Hanford is already  
the most contaminated site in the country.  
3 Burying any more adds unnecessary burdens  
to clean-up. Dumping more waste increases risk  
4 to health from contaminated groundwater. Transporting  
the waste increases risks to those living along  
the highways of the route.

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

- I am very concerned about DOE's current  
plan to ship and store more radioactive waste  
at Hanford. Is there ~~currently~~ <sup>Presently</sup> an EIS that  
adequately addresses  
1 \* transportation safety  
2 \* ground water (contaminated) / Columbia River  
Contamination health risks  
3 \* the added impact to Hanford Clean-up?

These are issues that must be fully understood before  
we proceed.

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

- 1 It is not fair that the federal government  
takes years of talking - only, not doing - about  
cleaning up the mess they made at Hanford and  
finally act, not to perform on cleanup  
promises, but to bring in more waste. I  
2 the point of further endangering a major waterway,  
endangering not only our fish but our people.

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

- 1 I am a Hanford Downwinder who is very concerned about adding more radioactive waste to Hanford. We need to take care of the waste already there.
- 2 We shouldn't be transporting waste for long distances on public highways where accidents or shipments could impact many people. Temporary storage near producers of waste and facilities to turn it into glass & other safer storage means should be constructed close to waste producing facilities. Then, this material, if necessary, could be safely transported to long-term storage in Nevada.

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

- 1 Once again the EIS is inadequate. I
  - 2 don't think any <sup>new</sup> materials should be
  - 3 brought into Hanford. DOE's poor track
  - 4 record in dealing with wastes already present on the site gives me no confidence that new contaminants will be properly handled. CLEAN UP HANFORD NOW !!
- No more lies, no more delay.

Please send me a response to my comment.

1 How can you possibly even consider putting  
radioactive waste in unlined pits - especially  
so near the Columbia River !!!!!!  
Do you have no morals?!? When the federal  
government can easily afford it - just look  
at the military budget! - and we now  
know that unlined pits are UNSAFE -  
how dare you?!?! How can you sleep  
2 at night?!? You are betraying the public.

Please send me a response to my comment.

1 I am shocked to hear of the fuel loads of chemical & radioactive waste being sent to Hanford. This will increase the risk of contamination to the ground water & Columbia river, it will add to the problem already there. This affects all residents of WA & OR. The Hanford clean up has been agonizing slow for years. Its ~~ridiculous~~ ridiculous to add to the problem already there. I am a registered voter & I strongly protest this latest outrage.

1 years ago I circulated petitions to stop the building of those nuclear plants at Hanford. It was heart breaking - we were told it would generate green power - a new miracle tech energy. Now again after huge cost overruns, followed by shutdown - followed by unimaginable pollution of the area + the Columbia we must hear that more "gunk" is going to be disposed of at Hanford. This is outrageous! Stop it NOW. Enough!
